Personalize your pet's transition ceremony:

Is there a particular location you would prefer? This should take into consideration the ability to create a quiet, comfortable environment for the pet to drift into a peaceful, euphoric state with the sedative and room for the caretakers to gather. The process can take up to 30 minutes so please consider temperature. This preference will always be superseded with the preference of the pet at the time and their ability to relax in that location.

When were you hoping to proceed? Is there a particular day/time of day you require?
